

Amendments to the Drawings:

The "Chart" referenced in the Specification was the subject of a Petition to Expunge as noted by the Examiner. A grant of the Petition was mailed on October 7, 2005.

While embodiments of the invention are directed to methods, Applicant contends that the Specification supports each of the claimed methods and inventions in their entirety despite the absence of drawings or figures. There are not many steps describing the invention, nor do the steps involve complicated equations or algorithms.

Accordingly, Applicant respectfully requests withdrawal of the foregoing objections.
